

Task report format

- pdf file
- Starts with header: University, School, Year, Subject, Task topic, Student name, surname, group, identifier, number in the current log
- Contains explicit specification of a task to resolve and variant of input data, including a process of its composition
- Contains sections corresponding to subtasks
- Contains conclusions and recommendations
- In case program code is a part of report, it should be either easily separable for a check or duplicated in a textual file
- Sections should be composed in a narrative form with explanations of input data, obtained results, and the process of solution
- Graphical material can be composed on computer or photographed from hand drawings
- Graphs and tables should have the corresponding titles
- The content should be understandable by a CS person who is not studying the module
